

THE WEEK IN REVIEW

It has been a crazy week! Between weather delays and conferences, the middle school kept themselves busy.

6th Grade Earth and Space Science & Geography

During Science class this week, sixth graders finished their activities and began to work on the study guide for the upcoming test.

In Geography, the students completed corrections to their map test. They previewed the next chapter on Mexico, Central American, and the Caribbean Islands with a chalkboard splash and a vocabulary activity.

7th Grade Life Science & Early U.S. History

The seventh graders continued to work hard on their science fair writing pieces. I've created a student-teacher conference list based on what the students have finished and will work with the students in small groups to complete their science fair boards. **There is a light at the end of the tunnel!**

In history class, the students completed their quizzes on Lesson 7.3: A More Perfect Union. They made corrections on Friday.

8th Grade Physical Science & Modern U.S. History

In science class this week, eighth graders completed a study guide for their quiz on Friday. The class also finished their toys! They will make corrections and demonstrate their toys next week.

The eighth grade class has been busy in history class working on their process Papers and Annotated Bibliographies.

LOOKING AHEAD

6th Grade Earth and Space Science & Geography

- Next week, 6th graders will begin to explore Mexico, Central America, and the Caribbean Islands with a map activity and notes.
- In science class, the students will present their activities to the class and review for the test on Calculating Density of Irregular Objects, scheduled for **Tuesday, March 21**.
***Study guides are to be turned in the day of the test.**

7th Grade Life Science & Early U.S. History

- In History class, students will learn about the life and accomplishments of Alexander Hamilton. They will complete an in-class reading activity on the election of 1800 as a test grade.
- In science class, the students will continue to work on various pieces of writing for the Science Fair board. The goal is to have the boards finished by **Friday, March 24!**

8th Grade Physical Science & Modern U.S. History

- During science class, the students will begin the next lesson- Energy Transformations.
- In history class, the students will complete their Process Papers and Annotated Bibliographies which are due **Friday, March 24**. They will also continue with notes for the last lesson in the chapter on World War I.

Thank you for all that you do to make our school great!
